

Profile (recommendation, calendar):

Description:

As a logged in user (see log in story) I may wish to view my profile which will contain personalized information. The profile page will consist of two components, a view of a calendar of your events you have selected that you wish to attend and based off these a list of recommended Events coming up next week in your location. This provides me with a personalized center to better visualize what events I am already going to and potential future events based on my interests. In order to navigate to this page I need to click on the profile selector on the home page(5). I can then scroll through my recommended events to view them and click left and right through my calendar to view different months of my I intend on attending.

UI designs:

Clicking (5) brings you here
