

User Story - Search Events:

Description:

As a user, I want to be able to search events in at a particular location during a specific week. I want to input a date and a location, and I want the website to the search results of events during that week at the specified location. I can also input a category for my search beforehand if I want to. On the result display page, I want to use filters to see different types of events. For example, if I click the category “music”, I want to see all the events related to music in my search results.

UI designs:

A hand-drawn UI design for a search event form, enclosed in an orange border. The design consists of three input fields arranged horizontally. The first field is labeled "Looking for (Category):" and contains a text input box followed by a downward-pointing triangle icon. The second field is labeled "In (Location):" and contains a text input box followed by a vertical line icon. The third field is labeled "On (Date):" and contains a text input box followed by a calendar icon.
