

User Story - Login

Description:

EventPlanner will require a login page even before you access any of the events/info. To sign up for EventPlanner you can either login with Facebook/Google or create your own user/pass through our own site. To define what happens when everything goes wrong, we'll include a forget password or forgot username button. The nice aspect of using 3rd party authentication is that they already have this done. The main purpose in this is making sure we have user information, so we can keep track of what events they are interested in or want to sign up for. We're including 4 different designs for logins and each captures a unique aspect of how one could log into our site.

Design 2)

A login form titled "EventPlanner" in a window. It features two social login buttons on the left: "Log in with Facebook" (blue text) and "Log in with GOOGLE" (red text). To the right are two input fields: "USERNAME" and "PASSWORD", both with a small icon on the right side. Below these fields is a "Login" button.

Design 3)

A login page titled "EventPro" in a window. It has a menu bar with "File", "Edit", "View", and "Help". Below the menu bar is a tab labeled "EventPro - Login". The main content area has a yellow background. It features a large heading "EventPro - Your All in One Event Planner" and a paragraph "Welcome message..... our mission etc...". At the bottom, there is a "Facebook Login" section with a yellow background. This section contains two input fields: "Email" and "Password", and a "Login" button next to a Facebook logo.
